

NOAH ALLEN

SOFTWARE ENGINEER

SKILLS

- **Languages:** HTML, CSS, JavaScript, C#
- **Frameworks:** .net, Next.js, Bootstrap, Tailwind
- **Libraries:** React
- **Tools:** Git, GitHub, PostgreSQL, MySQL, Firebase, Webpack, Postman, Figma, Miro, Netlify, DBDiagrams.io
- **Platform:** VS Code, Visual Studio, pgAdmin
- **Soft Skills:** Responsive & Disciplined Learning, Technical Research, Communication, Adaptability

EDUCATION

FULL-STACK WEB DEVELOPMENT

Nashville Software School | June 2024 - July 2025

Intensive part-time software development bootcamp focusing on full stack development fundamentals and problem solving. The final half of the program is executed in a simulated company environment with Scrum methodology.

COMPUTER SCIENCE

Eastern Kentucky University | August 2022 - May 2023

Completed coursework in Discrete Structures and Object-Oriented Programming, strengthening problem-solving and software design skills through hands-on projects, while gaining a deeper understanding of algorithms, data structures, and design patterns essential for building efficient and scalable software solutions.

GRAPHIC DESIGN

Somerset Community College | May 2019 - December 2020

Built a strong foundation in design, visual communication, and digital media through hands-on projects, while refining skills in user experience, graphic design tools, and digital content creation for impactful and engaging media presentations.

PROJECTS

PROOFED & POLISHED

React, JS, Next.js, & Firebase | [Repo](#), [Live Project](#)

A data tracking app for copyeditors with role-based access, capturing detailed financial and production metrics—including word count, hours worked, invoiced amount, hourly rate, and words per hour—across 266+ published works. Built in a focused 3-week sprint, prioritizing secure role-based permissions for streamlined oversight of financial data.

GIFTSUP.IO

React, JS, Next.js, & Firebase | [Repo](#), [Live Project](#)

A solo-built wishlist application that enables registered users to securely create, manage, and delete personalized wishlists and items tied to their account, with planned features for sharing with friends. Designed and launched in a focused 4-week build, emphasizing user authentication and data isolation to deliver a personalized, secure experience.

FULL-STACK BEATS (S.W.E)

C#, .NET, SQL, & React | [Frontend Repo](#), [Backend Repo](#)

A full-stack application enabling authenticated users to create, manage, and RSVP to virtual events. Built in a 6-week sprint as Scrum Lead of a 4-engineer team, with a focus on agile delivery, role-based access, and collaborative feature development.

EXPERIENCE

FREELANCE WEB DEVELOPER

October 2024 - PRESENT

Delivering responsive, data-driven web applications with React and Firebase, focusing on secure authentication, clean component architecture, and UI that's user-centric and optimized for usability, accessibility, and efficient task flow.

CONTRACT VIDEO EDITING

Torc | January 2025 - February 2025

Created tech-focused video content for social media, combining editing skills with industry insight to deliver timely, relevant content for job seekers, tech leaders, and recruiters. Content was informed by ongoing trends in the tech space, helping audiences stay current and engaged.

CREATIVE COORDINATOR

Branded78 | November 2020 - August 2024

Led end-to-end content production for clients, including communication, scripting, editing, filming, photography, and podcast creation. Developed content strategies aligned with audience trends, managed publishing schedules, and maintained organized digital asset libraries for streamlined execution.

KITCHEN LINE

Serendipity | May 2019 - January 2020

Managed day-to-day content tasks including client communication, filming, editing, and podcast production. Helped plan and schedule content, maintained digital assets, and ensured deliverables stayed on track.

CERTIFICATIONS

POSTMAN API FUNDAMENTALS STUDENT EXPERT

Apr 1, 2025 | Certificate

A hands-on certification covering the fundamentals of APIs and their role in modern software development, including using Postman to make GET, POST, PATCH, and DELETE requests, work with query parameters, headers, and response codes, implement basic scripting and API key authorization, and integrate APIs into real-world applications.
