CAREER SUMMARY

Experience	10+ years as Software Architect and Senior Full-Stack Developer with multiple medium-sized companies in the Technology Industry
Skill Highlight	5+ years leading accessibility initiatives and improving code quality at RainFocus across multiple teams and products
Languages	Python, JavaScript, TypeScript, Java, SQL, Go
Tools	AWS, GCP, Spring, React.js, Git, RESTful APIs
Other Expertise	Growing expertise in AI and Machine Learning, Innovation Pathways in Artificial Intelligence and Machine Learning, Fundamentals of Computer Systems, Cybersecurity and the Internet of Things, Leading Technology Transformation, Active contributor to open-source projects, Owner of web design/development agency

PROFESSIONAL EXPERIENCE

RainFocus Lehi, UT
Software Architect 08/2024 – Present

Technologies: Java, AWS, Microservice Architecture, RESTful APIs, Sentry, Javascript, React

- Reduced critical security vulnerabilities by approximately 25% through proactive code reviews and standardized security protocol implementation.
- Drove a shift-left approach to accessibility, integrating considerations into the design phase, improving platform compliance.
- Enhanced developer onboarding by streamlining setup and providing comprehensive documentation, reducing time-to-productivity.
- Implemented a POC for enhanced Sentry integration, demonstrating improved error tracking for complex system components..

Senior Software Developer 04/2024 – 08/2024

Technologies: Java, Spring, React.js, AWS, MySQL, SQL

- Led a team of 3 developers, providing mentorship and fostering continuous improvement, enhancing team productivity and code quality.
- Spearheaded a company-wide accessibility initiative, improving site accessibility from below 50% to nearly 90% WCAG 2.1 compliance.
- Established and enforced coding standards through regular code reviews, ensuring high-quality, maintainable, and accessible code.
- Collaborated with senior architects to design and implement secure, highly scalable solutions aligned with enterprise standards.
- Enhanced and maintained Registration and Hotel Management platforms, improving user experience and operational efficiency.
- **Promotion Reason:** Recognized for leadership skills, technical expertise, and contributions to accessibility initiatives.

Software Developer 10/2021 – 04/2024

Technologies: Java, Spring, React.js, AWS, MySQL, SQL

- Played a critical role in improving customer-facing site accessibility from below 50% to nearly 90% WCAG 2.1 compliance.
- Developed and implemented comprehensive automated testing strategies, increasing code coverage and reducing defect rates.
- Designed and developed RESTful APIs, facilitating seamless integration with client-facing applications.
- Improved overall system efficiency through performance optimization initiatives, resulting in significant gains in application responsiveness.

- Mentored team members on best practices in accessibility and test-driven development.

Netflix

Salt Lake City, UT

Studio Production Specialist

10/2019 – 10/2021

Technologies: Kibana, Internal Applications, Documentation Tools

- Provided technical support for over 50 applications, enhancing documentation and asset management processes to improve operational efficiency.
- Conducted detailed technical analysis and severity assessments using Kibana, contributing to timely issue resolution and system stability.

Tier 3 Technical Research Analyst

06/2018 – 10/2019

Technologies: Python, Web Applications, Internal Tools

- Designed and developed a Python web application that resulted in \$5.1 million in operational cost savings.
- Analyzed trending issues to drive resolutions for over 170 million customers, showcasing expertise in large-scale problem-solving.

United States Air Force

Hill AFB, UT

Interactive Multimedia Instruction Software Developer

08/2015 – 08/2017

Technologies: Actionscript 3, HTML5, JavaScript, CSS

- Led a team of developers in building engaging and interactive multimedia courseware for the USAF, enhancing training effectiveness for over 100,000 aircraft maintainers.
- Developed a comprehensive training plan for the transition from Actionscript 3 to HTML5/JavaScript/CSS.
- Collaborated with subject matter experts to gather and analyze course content and objectives.
- Researched and implemented innovative instructional design strategies.

PROJECTS

zero-astro

2024-current

Technologies: Astro, JavaScript, TypeScript, HTML, CSS, PostgreSQL

Developed an open-source beginner-friendly starter kit for building websites using the Astro framework and

Zero-sync <https://github.com/ferg-cod3s/zero-astro>

- Focused on a modular component architecture for efficient development and scalability.
- Built and maintained an open-source project for the web development community.

EDUCATION & ACCREDITATIONS

Masters of Information Technology

06/2023 – 05/2025 (Expected)

Virginia Tech, Blacksburg, VA

- Relevant Coursework: Innovation Pathways in Artificial Intelligence and Machine Learning, Fundamentals of Computer Systems, Cybersecurity and the Internet of Things, Leading Technology Transformation

Bachelor of Science in Software Development

10/2017 – 10/2019

Western Governors University, Salt Lake City, UT
